

ADAPTATION TO NONCLINICAL SETTINGS

AACAP GUIDELINES

School-Based Telepsychiatry

- The psychiatrist should:
 - be knowledgeable about the school and its culture
 - define the model of care
 - clarify the psychiatrist's role

- FERPA should guide determination of the infrastructure
 - e.g., interview room, accompanying staff, and documentation

- Informed consent should consist of the legal guardian and the patient in real time according to local, regional, and national laws

- Determine how medications are provided during the summer months
