

# ROOM SET-UP CHECKLIST

## Integrated Systems Using Telemedicine (ISUT)

- Ask family to bring some of the child's favorite interactive and constructive toys

- Legos, magnatiles, cards, colors, pretend farm, Mr. Potato Head

- Ideally do not allow iPhone or screen time, as transitions are often difficult

- Confirm that the camera's position can capture the child's play and interactions

- Set expectations about who the family is comfortable with in the room

- Have someone available to take the child out of the room and attend to them when the child's challenging behaviors are being discussed
